TABLE OF CONTENTS

Abstract i
Table of Contents iii
1.0 Introduction 1-1
1.1 SR1 Corridor Project 1-1
1.2 NHPA Compliance 1-2
1.3 Public Outreach 1-3
2.0 Environmental Setting 2-1
2.1 Site Location 2-1
2.2 Present Environment 2-1
3.0 Cultural Background 3-1
3.1 Regional and Local History 3-1
3.1.1 1630-1730+/- Exploration and Frontier Settlement 3-1
3.1.2 1730-1770+/- Intensified and Durable Occupation 3-3
3.1.3 1770-1830+/- Early Industrialization 3-6
3.1.4 1830-1880+/- Industrialization and Early Urbanization 3-9
3.1.5 1880-1940+/- Urbanization and Early Sub-urbanization 3-10
3.2 Previous Archaeological Survey and Research 3-12
3.2.1 UDCAR 3-13
3.2.2 LBA 3-14
3.2.3 Parsons, Inc. 3-16
4.0 Historical Research Contexts 4-1
4.1 Historic Research Contexts 4-1
4.1.1 1730-1770 – Intensified and Durable Occupation 4-1
4.1.2 1770-1830 – Early Industrialization 4-2
4.1.3 1830-1880 – Industrialization and Early Urbanization 4-2
4.2 Historical Research Topics 4-3
4.2.1 Domestic Economy 4-4
4.2.2 Manufacturing and Trade 4-4
4.2.3 Landscape 4-5
5.0 Methodology 5-1
5.1 Historical Research methodology 5-1
5.2 Field Methodology 5-2
5.2.1 Phase II Site Evaluation 5-3
5.2.2 Phase III Data Recovery 5-6
5.3 Laboratory Methods 5-12
5.3.1 Field Lab Procedures 5-12
5.3.2 Fairfax Lab Procedures 5-13
5.3.3 Analytical Methods 5-13
5.4 Special Analyses 5-17
5.4.1 Soil Chemistry 5-17
5.4.2 Brick Chemistry 5-19
6.0 Site History and Historical Land Ownership 6-1
6.1 Jones Site History – Introduction and Land Use Summary 6-1

6.2 The Thomas Brown Tract 6-10
6.3 The William White Tract 6-21
6.4 The Turner Tract 6-26
6.5 George Davis and Consolidation 6-29
6.6 Post-Davis Ownership 6-35
7.0 The Jones Site: Archaeology 7-1
7.1 Site Evaluation: Field Strategy and Findings 7-1
7.1.1 Shovel Testing 7-1
7.1.2 Test Units and Stratigraphy 7-4
7.1.3 Features 7-4
7.1.4 Summary and NRHP Recommendations 7-5
7.2 Data Recovery Feature Summary 7-7
7.3 The Brick Clamp Complex 7-10
7.3.1 Heat Signature (Feature 18) 7-11
7.3.2 Clay Mixing Pit (Feature 4) 7-15
7.3.3 Linear Depressions (Features 22 and 142) 7-26
7.4 Wells 7-29
7.4.1 Three-Barrel Well (Feature 268) 7-29
7.4.2 Brick-lined Well (Feature 156) 7-38
7.5 Pits and Amorphous Features 7-43
7.5.1 Shallow Ditch (Feature 27) 7-43
7.5.2 Feature 149 7-44
7.5.3 Historical Pit (Feature 159) 7-46
7.6 Posthole Features 7-48
7.7 Terra Cotta Drain Tile System 7-57
7.8 Isolated Features 7-62
7.9 Summary 7-64
8.0 Analysis and Discussion 8-1
8.1 Site Artifacts: Site Chronology and Function 8-1
8.1.1 Summary of Artifacts from Site Evaluation 8-1
8.1.2 Artifact Analysis 8-2
8.1.3 Artifact Distribution Analysis 8-12
8.1.4 Interpretation 8-19
8.2 Coopering and Barrels 8-23
8.2.1 Feature 268 Barrel Descriptions 8-23
8.2.2 Coopering History 8-30
8.2.3 Coopering as a Delaware Industry 8-31
8.3 Brick Making at the Jones Site 8-40
8.3.1 Brick Manufacturing and Brick Clamps 8-40
8.3.2 Brick Chemical Analysis 8-58
8.4 Wells 8-62
8.4.1 Well Construction 8-62
8.4.2 Jones Site Wells and the Landscape 8-69
8.5 Rural Landscapes and Land Utilization 8-70
8.5.1 Soil Chemistry and Ephemeral Occupations 8-70
8.5.2 Background on Soil Chemistry Analyses 8-70

8.5.3 Soil Chemistry Analysis 8-83
8.5.4 Chemical Test Elements 8-85
8.5.5 Discussion 8-94
9.0 Conclusions 9-1
9.1 Soil and Brick Chemistry Effectiveness 9-1
9.2 Conclusions and Implications for Regional Historical Archaeology 9-2
10.0 References Cited 10-1
