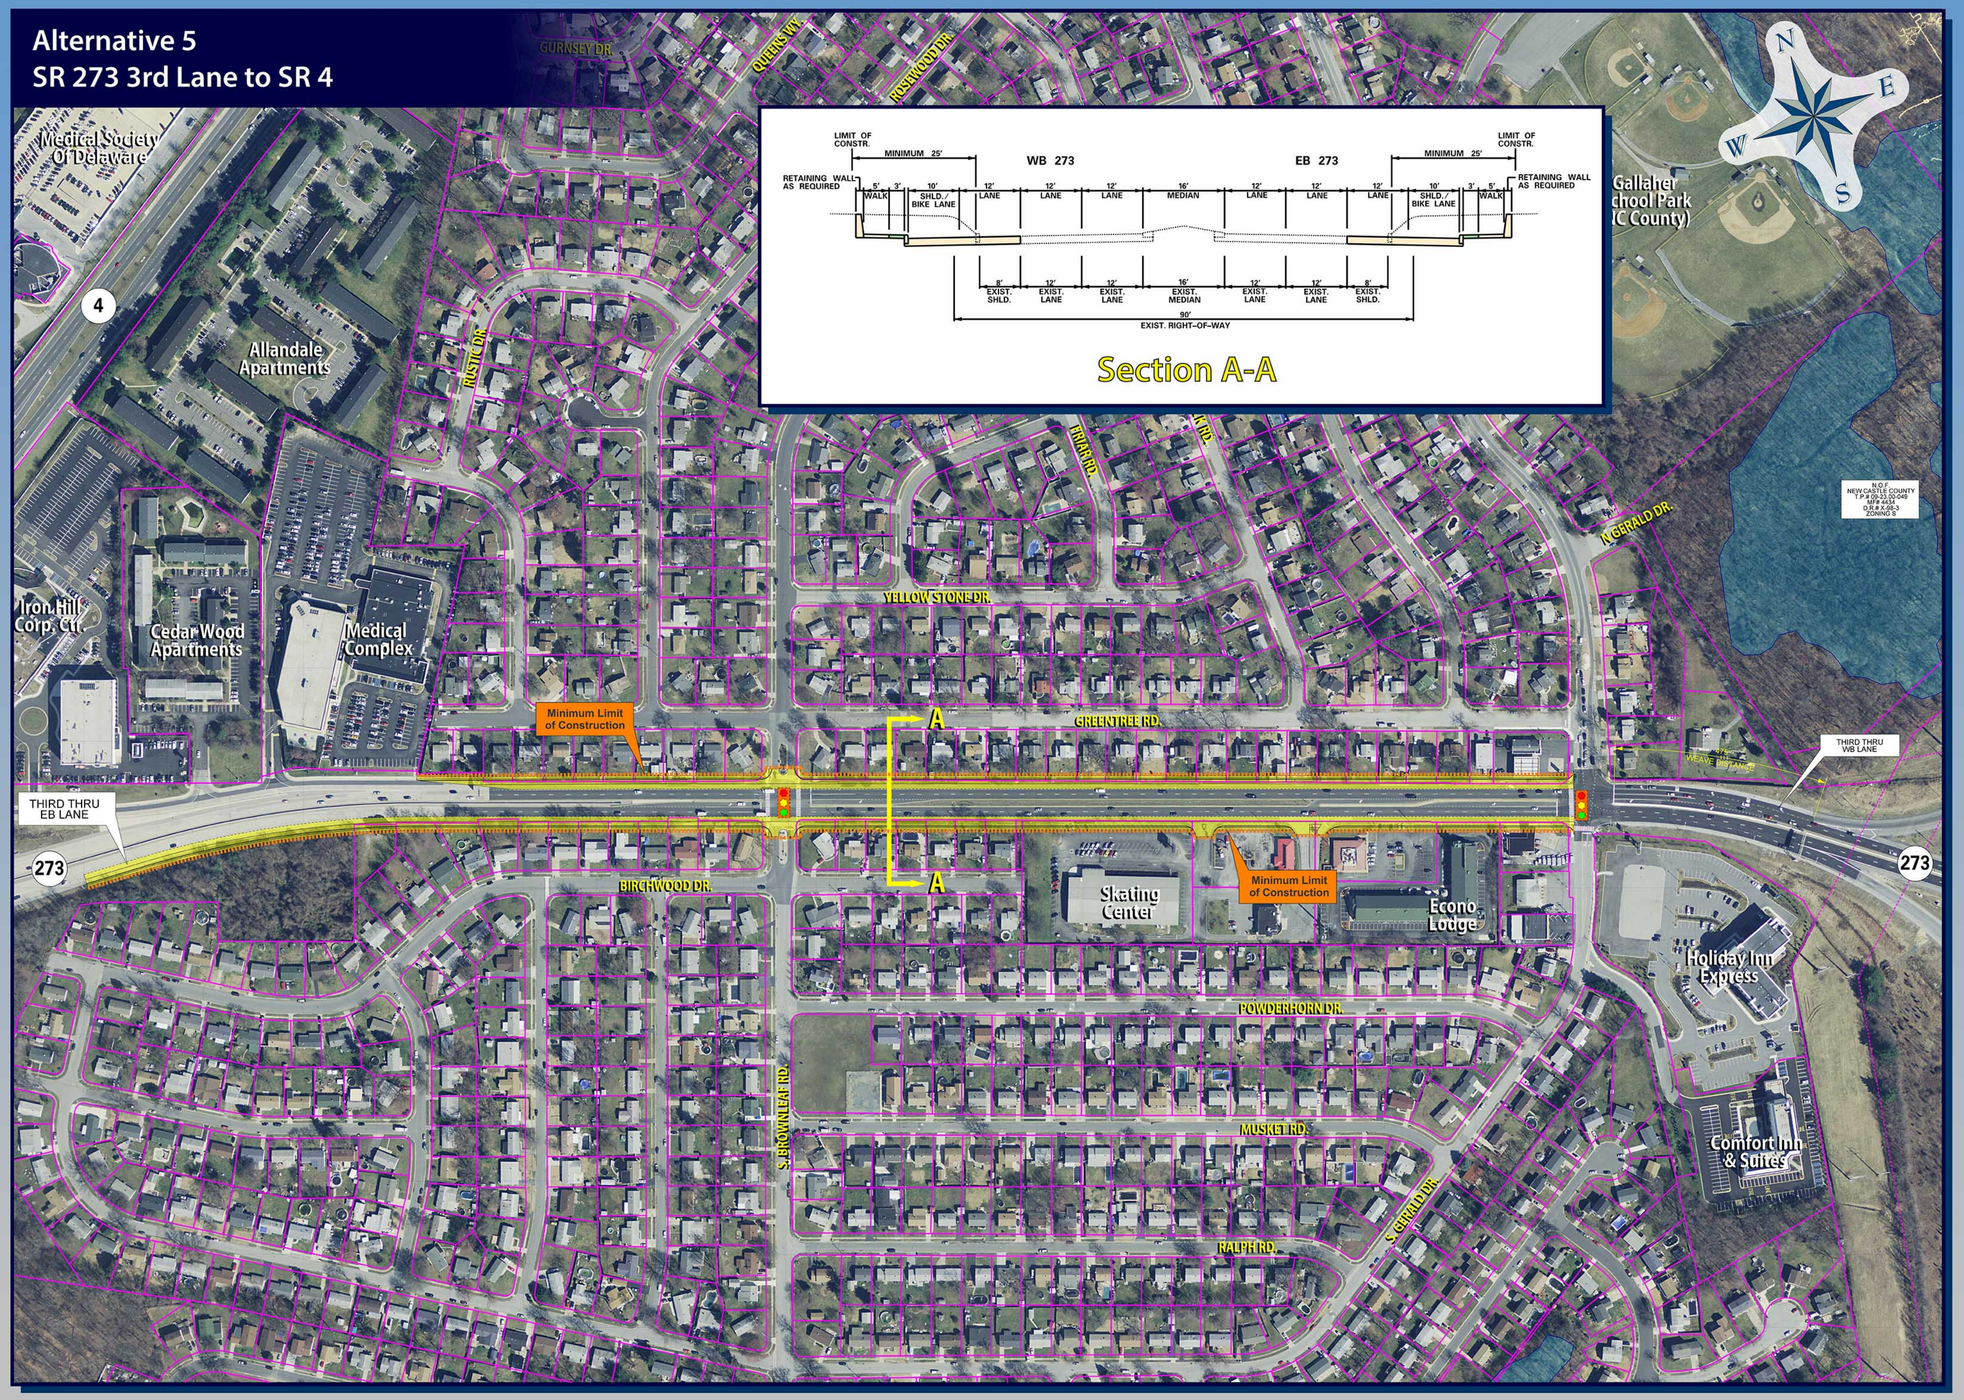
Alternative 5 SR 273 Widening



Advantages

- Adds third WB 273 through lane from I-95 off ramp to SR 4 interchange, greatly increasing the merge distance from SB I-95 ramp onto WB 273
- Adds third EB 273 through lane from SR 4 interchange to Harmony Road, decreasing delay and queue at the Brownleaf Road and Harmony Road intersections
- Provides EB & WB 273 bike lanes and sidewalks

Disadvantages

- Requires purchase of right-of-way along EB & WB 273 between Harmony Road and SR 4 interchange

Alternative 5 can be combined with all alternatives.
