PDCA V2 Updates

Delivery Date:

March 22, 2017

Message:

Announcement!

Beginning on April 5th PDCA will be changing. We have been working diligently over the past several months to update PDCA and we are finally ready to release it.

- One major change from the previous version is that separate submission for each review type are now required. So, for a major project, there will be separate submissions for a Record Plan and an Entrance Plan.
- .zip files will no longer be accepted, you will now be able to just drag and drop your files for upload
- There will be a small window of time between the current application going off line and the new one being activated. We will have more information on this in a future email blast.

Please see the attached pdf document for more details on the changes.
