## ACKNOWLEDGMENTS

Peter W. Rees, Ph.D., for his continuous, tireless guidance, academic support and encouragement during this past year.

My professional friends and colleagues, who have supported and helped me throughout my graduate education.

This manuscript is dedicated to:

My parents, Eleanor and Max, for their endurance and unconditional love.

My brothers and sisters, for not letting me give up when I was tempted.

Those countless friends and relatives who believed in me when I did not believe in myself.

I thank them all.
