

Environmental Screening

Working with environmental agencies, existing resource and community information has been compiled and mapped in an Environmental Screening Inventory.

This assessment of natural and cultural resources and community features will be used in the development of alternatives to avoid and minimize resource and community impacts.

Information has been assembled on:

- Puncheon Run and its tributaries
- Isaac Branch and its tributaries
- Wetlands and floodplains
- Agricultural areas and districts
- Parklands and public open spaces
- Archeological and historic resources
- Threatened and endangered species habitats
- Contamination concerns
- Community characterization
