

## ACKNOWLEDGMENTS

---

---

Hunter Research gratefully acknowledges Mark Eberle, Biologist/Project Manager, U.S. Army Corps of Engineers, Philadelphia District, for his assistance in providing project-related materials and coordinating our activities. We also acknowledge Peter Pellissier, at EA Engineering, Science and Technology, Inc. for his assistance in administering this work. David Hawley, P.E. of the U.S. Army Corps of Engineers kindly provided current and historic plans of the canal and gave assistance in tracing its history.

The staffs of the following institutions are thanked for their assistance: Delaware State Historic Preservation Office, Historical Society of Delaware, Maryland Historical Trust, Historical Society of Cecil County, Maryland State Archives, and the National Archives and Records Administration.

Overall direction for this project was provided by Richard Hunter. Background research for this survey was performed by Cheryl Hendry under the supervision of Damon Tvaryanas and James Lee. Archaeological field survey was performed by James Lee with help from Joshua Butchko. The report graphics were drafted by Frank Dunsmore. Final report coordination and assembly were undertaken by James Lee. This report was authored by James Lee.

James Lee, M.A.  
Principal Investigator
