RESEARCH INTERESTS:

Cultural Resource Management - experience as State Archaeologist in program developed by writer to conduct reviews of all construction projects within State. Continued interest as member of State Review Board for the National Register Program and as Principal Investigator on over twenty projects for Mid-Atlantic Archaeological Research, Inc. Serves as Delaware representative to SAA Committee on Public Archaeology and is a member of the American Society for Conservation Archaeology. Has been a member of the Society of Professional Archaeologists since its inception and is registered in six categories.

Environmental Archaeology - coordinated a major publication on the pre-historic subsistence/settlement patterns of the Delmarva Peninsula and has been involved in environmental studies of Middle Atlantic prehistoric populations.

Historic Sites Archaeology - excavated a large number of colonial American sites in four States and has prepared reports on same. Among these projects were domestic sites, industrial sites and military sites.

Prehistoric Trade - conducted original research into trade and communications among Middle Woodland and Early Woodland peoples of the Atlantic Seaboard. Authored several reports on this research and will use similiar data as a research topic for Doctoral discertation at Temple University.

Mortuary Practices - excavated a major Amerind prehistoric cemetery in State of Delaware (Island Field Site) and authored reports on the mortuary practices of the sociocultural group involved.

Lithic Technology - conducted distribution study of lithic materials used and traded by prehistoric peoples of eastern United States and Canada. Supervised research into the "fingerprinting" of lithic sources for detailed identification purposes (using atomic absorption analysis). Founded and edited publication on lithic sources (Lithic Source Notebook).
