

## AND, IN THE END...

The report you have just read tells, briefly, what happened from July 1, 1959 to July 1, 1960.

The Highway Department operates in the present, yet must plan for the future. Just how good that future will be, in terms of highway services, is to be determined by you, the individual citizen.

More service is needed now; more, much more, will be needed in the future. This fact should be apparent after a reading of this report.

More and better highways are needed . . .

More State Police Service is a necessity . . .

More thorough and frequent examinations of both vehicle and driver are needed . . .

A united assault on the mosquito is required . . .

And, if we are not to lose our valuable beachlands, more erosion control work is required . . .

The Highway Department, and all its services, are owned and controlled by you, the citizen of the State of Delaware. Whether the money comes from State funds or Federal funds, it is your money.

In short, then, the job facing the Department in the future is up to you, an informed citizenry.

How will you have it done?

## WHERE TO CALL WITH YOUR PROBLEMS

### DAY AND NIGHT NUMBERS
