

SUMMARY AND CONCLUSION OF ARCHITECTUREAL RESOURCE SURVEY

An architectural resource survey was conducted for the S.R. 24 Planning Study in Winter 2002/2003. The purpose of this survey was to identify all buildings and structures, 50 years in age or older, situated within the Area of Potential Effect (APE) for the S.R. 24 Planning Study.

A total of three (3) properties have previously been identified in the APE. Eleven (11) individual properties meeting the 50-year old or older guideline for evaluation were identified during the course of this study. The Cultural Resource Survey (CRS) forms for these resources are contained in *Appendix A*. The original forms for the previously identified resources are situated behind the CRS forms completed for the current survey.

Two (2) resources are being recommended individually eligible for the National Register of Historic Places. The Hart Property (S-1003) and the Powell Property (S-1005) are both recommended eligible under Criterion C as good examples of vernacular farm houses.

A table of these findings can be found on the following page. The table includes the property's CRS number, name, approximate location along S.R. 24 between Love Creek and Route 1, and the evaluation recommendation. The table is color-coded to indicate previously identified resources in orange and properties surveyed during the current survey in blue
