

Millenium Information Technologies, Inc. (MITI)

CORPORATE CAPABILITIES

Millenium Information Technologies, Inc. (MITI) is comprised of highly skilled and experienced technology professionals whose goal is to provide technical solutions to our clients. We provide innovative expertise when technology demands it. Our consultants are knowledgeable of current software, committed to customer satisfaction, reliable and provide quick quality solutions. We believe this combination makes us a strong partner with resources that can assist our customers with critical technology and solutions support.

In 1998, **Millenium Information Technologies, Inc.**, was founded by **Marilyn Warren**, an information technology veteran, a former IT instructor with background in consulting, software development and design, operating systems, and project management. The vision was to build a company that would become a leading technical service provider known for delivering innovative and cost-effective IT solutions that would simplify the business processes. **Millenium Information Technologies** continues to provide customized consulting expertise and solutions to our clients.
