

# **Welcome to the Churchmans Road Trail Workshop**

**This project is a concept design study to evaluate alignment alternatives for connecting the existing trail on Churchmans Road (near Airport Road) to the new Route 273 Trail.**

**The proposed trail connection will extend east along Churchmans Road to Route 273, crossing US 13 and eventually connecting to the Route 273 Trail.**

**Alignment options include crossing US 13 at the signalized intersections of Route 273 or School Lane.**

**Based on the results of the study, one alignment will be chosen as the preferred alternative. The study will summarize impacts and cost, including right-of-way, final design, and construction. This is a study only; final design and construction are not funded or scheduled.**
