

PROJECT PURPOSE & NEED

- The purpose of this project is to improve traffic safety and operations by removing the existing unsignalized T-intersection at Old Orchard Road and Savannah Road.
- A realignment of Old Orchard Road will be implemented to intersect with Savannah Road opposite of Wescoats Road at a signalized intersection. Turn lanes will be added on each approach to the intersection. A roundabout is proposed at the intersection of Wescoats and Marsh Roads to accommodate vehicles desiring to access Clay Road and points to the east.
- Pedestrian and bicycle facilities will be incorporated throughout the project limits.

PROJECT SCHEDULE

Design	2018-2020
Right-of-Way Acquisition	2019
Construction	2020-2021
